

Simplify your integrated packaging supply chain

Traditional integrated packaging steps vs. a streamlined approach

TRADITIONAL PROCESS

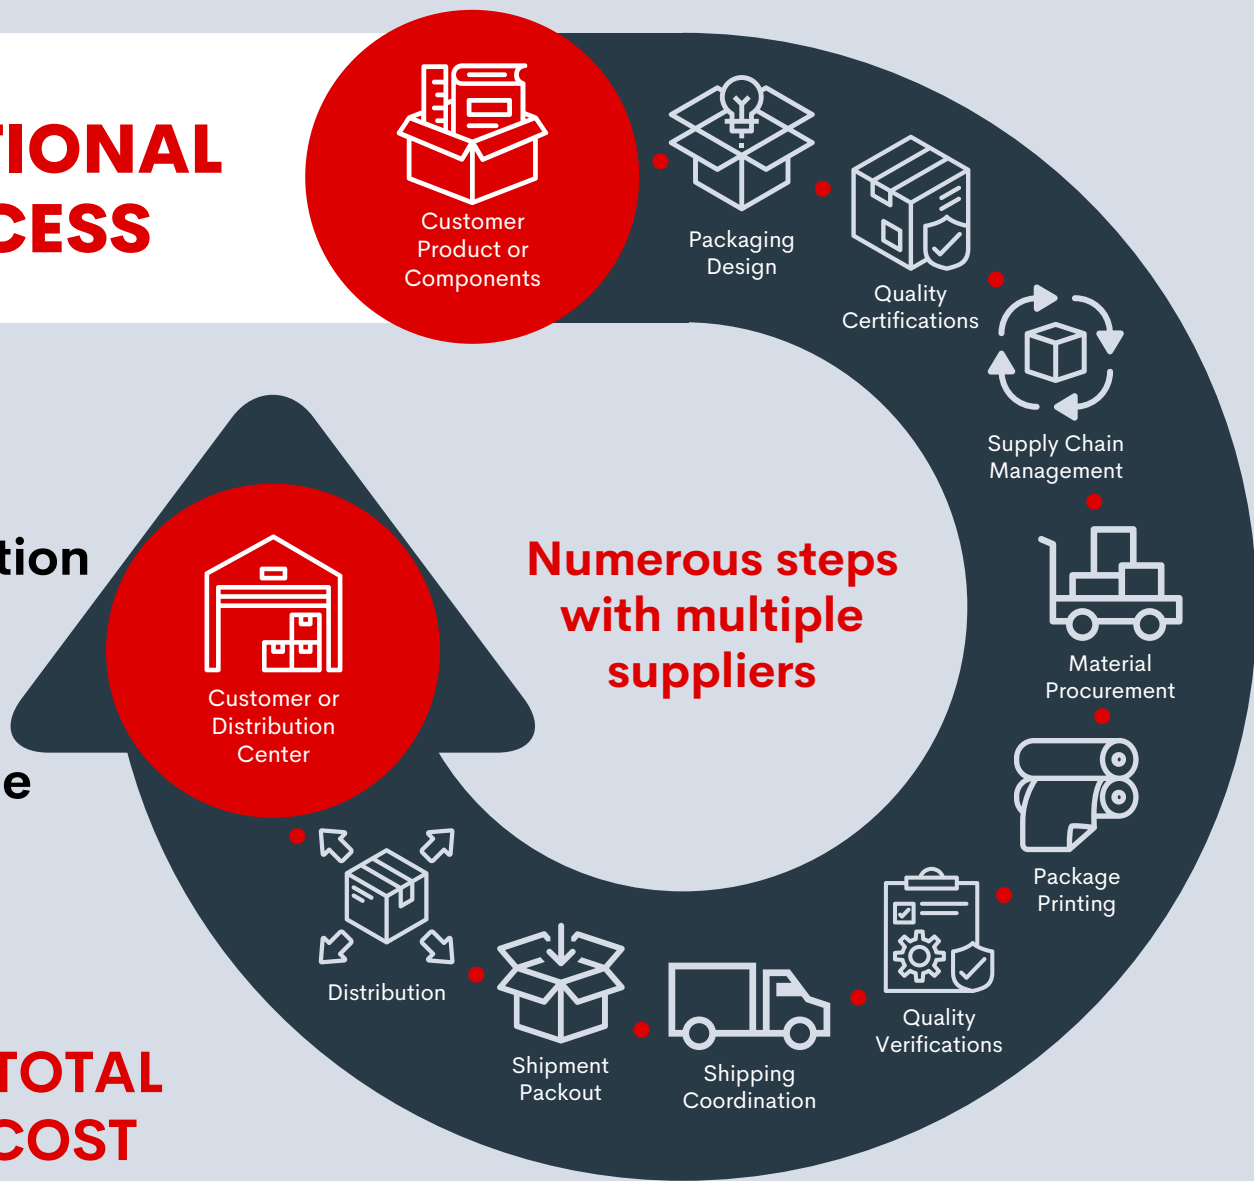

Increased transportation

Slower time to market

HIGHER TOTAL LANDED COST

Constraints of the Traditional Integrated Packaging Process

- Coordinating multiple partners and handoffs
- Transportation costs from point to point
- Higher storage costs
- Managing flexible workforce
- More steps in packaging design process
- Increased risk of defects or late deliveries
- Risk of failed audits
- Slower speed to market

SIMPLIFIED PROCESS

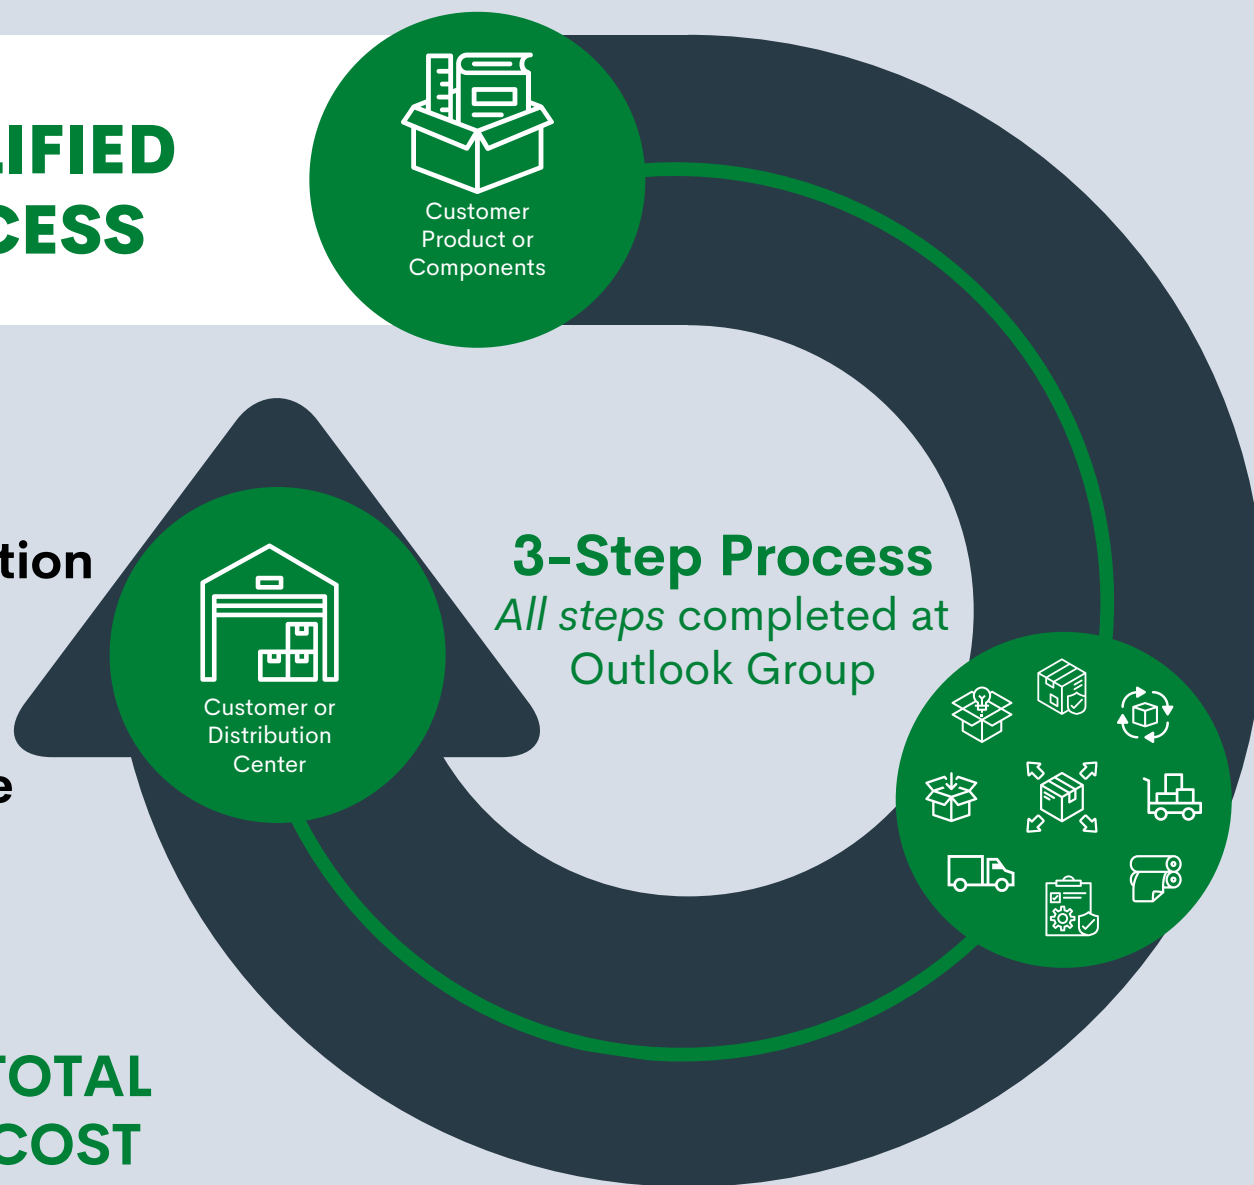

Decreased transportation

Faster time to market

LOWER TOTAL LANDED COST

Transform Your Contract Packaging Process with Outlook Group

- Combine printing with packaging
- Only one partner to contact
- Dramatically reduced transportation costs
- Streamlined packaging design process
- Faster speed to market
- Workforce flexible to volume
- ISO 13485 certified clean room facilities
- G7 Master Printer certification

Case Study: Medical Device Manufacturer

Packaged and shipped 13+ billion devices with 0 rejects

Doubled capacity of previous supplier on day 1

Decreased supply chain from 3,000 miles to less than 150

Decreased packaging partners from 3 to 1

99.99% on-time delivery rate with 100% data integrity
